

# Securitex AC-010 “Roger”

## Data Collector and audit Control system

---

The Roger AC-010 is developed to ease the monitoring of movement in and out of building and construction site as this device can hold up to 4000 proximity cards and have an event buffer that hold up to 48000 event without and online PC connected. At Securitex we carefully select the best equipment in the industries to put together a complete system for your data collection needs. Our group of professional electrical and mechanical engineers together see to your every need from a single data collection point to a network system environment you can count on us. This data collector is even able to retain the data after the power outage. The system is so robust and elegant that it can be used in any kind of interior deco. This system can be install on wooden, metal and even glass sliding as well as swing door and even on construction side guardhouse

UT-2 RS485 converter

Power Supply	Rechargeable battery	Proximity card
		
Figure 1	Figure 2	Figure 3
Power supply unit is used to provide the power needed for all access control system equipment like the card/pin reader system controller and the EM-lock. During power outage the power supply will ensure your door remain closed until the power is resumed. This kind of power supply can provide back-up supply from the battery up to 4 hours.	Rechargeable battery is install in the power supply shown on Figure 1. In normal condition the battery is in a charging state. The charging is maintained by the charging circuit built-into the power supply. During power outage the charging circuit switch state and this battery take over and continue to provide power to the whole system up to 4 hours.	Proximity card is use in the Roger data collector by just flashing on the card reader.  For personal identification we are able to provide self-adhesive label and printing for the individual staff. Thus this card can also be used as staff pass.

Note:

Our data collector is able to provide raw data in CSV and EXCEL format such that this data can be export for other application example time and attendance. For access control application please visit us at <http://www.securitex.com.sg>
