DTC300

DIRECT-TO-CARD PRINTER/ENCODER

The unbelievably easy way to print and encode plastic ID cards.

Securing your organization just got easier.

There's no easier way to increase your employees' security and decrease your organization's vulnerability than by issuing photo ID cards. And now there's no easier, more dependable way to issue photo ID cards than with the new DTC300 Direct-to-Card Printer/Encoder from Fargo.

Everything about the Fargo DTC300 is specifically designed to make issuing IDs and securing your organization go smoothly. It's simple to operate, and there's virtually no learning curve or maintenance. Plus, you can effortlessly increase productivity by integrating the DTC300 with your existing human resources, time and attendance, visitor management or access control systems. Add in our free card identity software and 2-year warranty, and it turns out the DTC300 is easily the best value for your budget, as well.

Never deal with ribbons or card cleaning hassles again.

Anyone who's ever operated a card printer before knows the drill: ribbons are difficult to load, separate card-cleaning mechanisms are a pain, and those blinking indicator lights are more confusing than helpful. The DTC300's *next-generation* "one-way" design eliminates these problems once and for all. It's the first printer to feature Fargo's SmartLoad™ Ribbon Cartridge, our all-in-one print ribbon/card cleaning system. This handy, disposable cartridge installs in one unbelievably easy step — just slide it into place and you're done. Best of all, our patent-pending SmartClean™ Roller is integrated into every cartridge, so you'll never have to deal with a separate card-cleaning mechanism again.

Troubleshooting is unbelievably easy.
Fargo's exclusive SmartScreen LCD Control Panel replaces confusing indicator lights with easy-to-understand prompts and commands. You'll always know the status of your DTC300.

Never again wonder what your printer is telling you.

Another *next-generation* feature of the DTC300 is Fargo's exclusive SmartScreen™ LCD Control Panel. Unlike other card printers that communicate with confusing, blinking lights (or worse, no indicator lights at all), the DTC300 features a clear display of easy-to-understand prompts and commands. You'll constantly know the status of your printing and encoding.

There's no easier way to produce high-quality plastic cards for:

- K-12 Schools
- Small Corporations
- Parks and Recreation
- Health Clubs
- Recreational Facilities
- Ski Resorts/Lodges
- Loyalty Applications

Encoding? Printing on both sides? That's unbelievably easy, too.

Fargo's optional e-card modules make adding functionality to your cards hassle-free. You can greatly increase your organization's efficiency and security by integrating magnetic stripe, proximity card or smart card functionality with your existing systems.

Need both sides of your card printed? Simply order your DTC300 with a dual-sided printing module. You'll save time by printing both sides in a single pass.

Best of all, it's easy to get started.

No one ever said making your organization more secure would be easy — until now!
