for sliding gates with max weight of 1.800 kg

844 ER Z16 for rack applications

844 R for rack applications (without pinion)

844 R CAT for chain applications

844 R RF for chain applications with idle transmission

IDEAL FOR COMMERCIAL OR INDUSTRIAL GATES

The FAAC 844 gearmotor was designed to move the heaviest commercial or industrial gates in the simplest, most convenient way.

TOTAL SAFETY

The special twin-disk anti-crushing clutch, in oil-bath, enables thrust adjustment from 0 to 110 daN. As the gearmotor is non reversing, no electric locks need be installed and, in the event of power failure, the key-operated release device makes it possible to open and close the gate manually.

LONG LIFE

Constant, complete oil-bath lubrication of mechanical components plus assembly in a high resistance pressure – cast aluminium body ensure a very long life.

RELIABLE, SAFE ELECTRONICS

All commands come from a FAAC designed control board with microprocessor, on the leading-edge in terms of safety and reliability. Leaf stopping space can be electronically programmed.

EASY AND INEXPENSIVE

The electronic equipment housed inside the gearmotor facilitates and speeds up installation, at lower cost.
