

Implanted-Type Mounting Base

Design Characteristics

- Major advantage of compatible mounting base is to save time on select proper detector for various purpose and able to install the base quickly and continuously during field installation. Afterwards, just plug-in proper detector head to complete the project.
- This unique mounting base is designed to match the original decoration design and visual effect perfectly with detector implanted to ceiling. Furthermore, it will make the entire decoration even looks better.
- This base has optional Power-off Warning feature to ensure that the system will operated normally.

Dimensions

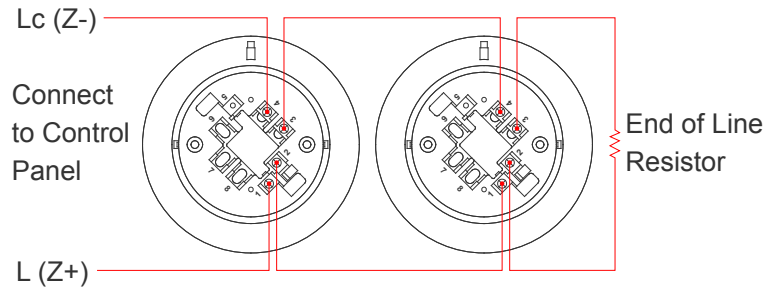

Features

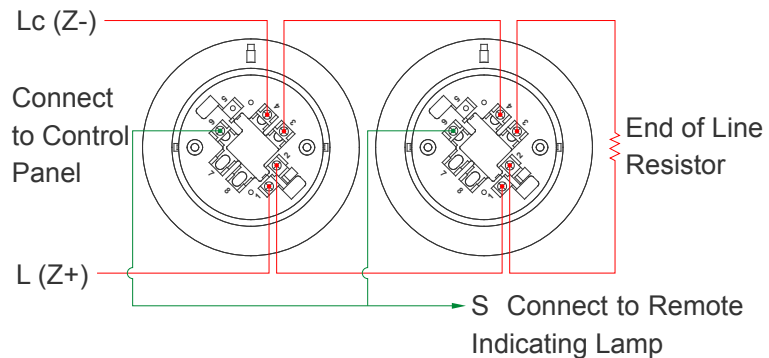

Model	Feature, Application	
AHMB-2	2-wire	Apply to conventional fire alarm control panel.
