Wall Pad KHN-670

High-end Home Network Solution
Chiefly composed of **main display (KHN-670 wall-Pad)** and the **home gateway** comprehending inside and outside home network, KOCOM high-end Home Network Solution wholly provides major services indispensable for realizing highly elegant intelligent home.

Control of Household Appliances
using Internet or mobile phone from outside of house, users can control electrical appliances such as air conditioner, washing machine, heater, refrigerator, electric range, etc.
Control of Living Equipment : it provides control function for lightings, gas and curtains everywhere at home.
Remote Access Control for Entrances users are able to check the visitors image and make access control for entrance from everyplace at home as well as from outside of house using internet or mobile phone.
Intruder Detection & Alarm System It provides useful security such as accident detection functions using fire & gas leakage sensor in absence of users and outside intruder detection using magnetic sensor & motion detector. It automatically reports to the preset contact point after detecting the accident.
Remote Monitoring users can monitor the apartment complex facilities such as playground, kindergarten, play room, parking lots, etc., which promotes security and safety in daily life.

Wired and Wireless Network It enables users to create home office by providing proper network environment. Large data including images, music and moving images become easily transmitted, stored and shared. By connecting to internet using PC, PDA or mobile phone at anytime and anywhere, users are able to access to and use user centered communities in a more convenient way. Providing a variety of services such as unmanned system, remote medical examination and remote meter inspection through smooth networking within apartment complex, this high-end solution enables users to entirely manage the apartment

Item	Specification
Main display	**Wall Pad KHN-670**
Screen	7" TFT-LCD
Communication System	Hands-free
System Capacity	Door Camera : 1circuit / Opening and shutting door : 1 circuit, Emergency button : 1 circuit
Door Camera	4wires
Guard Room	8wires
Sensor	Magnetic 2wires / IR 3wires / Gas(DC) 3wires / Fire 2wires
Emergency Button	2wires
Power Source	Only for AC 220V or AC 110V / 60Hz, 50Hz
CPU	ARM9 RISC(32bit)
Memory	64MB Flash Memory 61SDRAM
Camera	Mobile type VGA Level CMOS Sensor
O/S (Applied S/W)	WinCE. NET 4.2 / Home Manager Program
Assurance Temperature	0℃ ~ +50℃
Dimension	(W)329x(H)231x(D)17mm
