Audio Intercom system

The Ebelco audio intercom system is a very rugged outdoor intercom system that can withstand the most adverse weather condition. It is most suitable to be used as a replacement from doorbell to intercom. This system is very suitable to be used in most residential house examples, Terrace / Semi-detach and even bungalow houses. This system can easily replace most existing intercom systems as it uses only 2 wires from the door station to the handset. To make the installation even easier, the entire system is powered by 4 AA batteries.

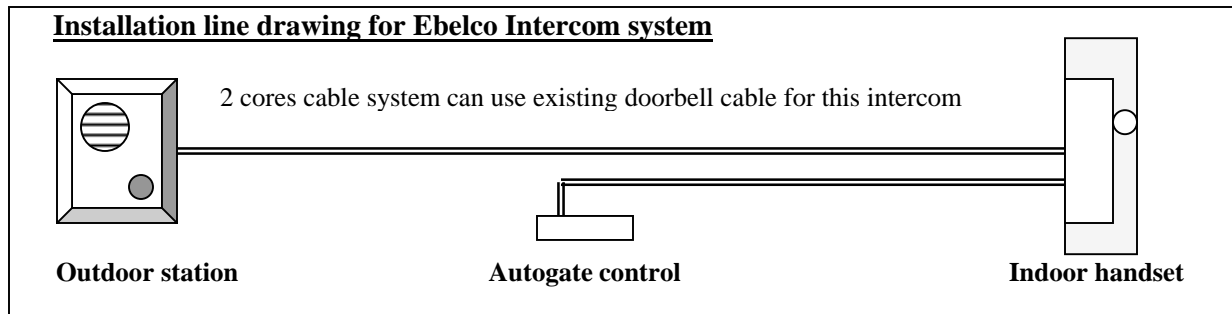

Features include:

The above system even c/w doorbell, intercom, auto door or auto gate opener, handset LED indicator, adjustable chime, volume control and weatherproof outdoor unit.

Operation:

At the door station (calling): Momentarily depress bell button then talk and listen hands free.

At Inside Station (receiving): When 2 tones chime sounds, pick up handset and talk just as on a standard telephone. To release gate momentarily depress door opener to activate the door lock or outside gate. To end conversation just securely replaced handset on the cradle it's that simple.

Specifications:

Power source: DC 6V (LR 6-AA).

Power supply: Batteries only, 4 pieces X 1.5 V (6V).

Consumption: In use 30mA, Chime signal 150mA.

Signal sound: Electronic chime call sound.

Wiring: 2 wires installation.

Communication range: Distance 300 metres-diameter 0.65mm cable gauge.

Note:
