Syris Management System
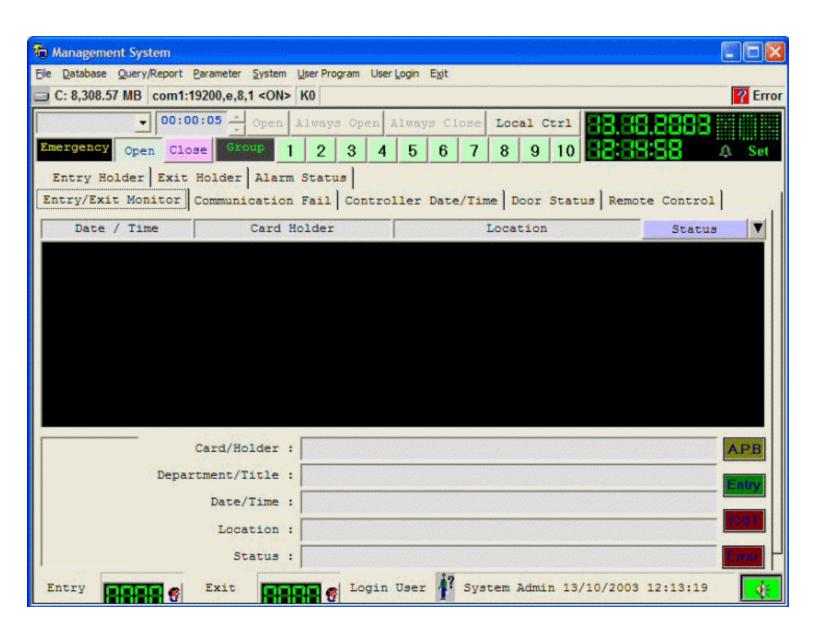

SYRIS

Low Cost - High Performance - Top Quality - Excellent Features

Management Software

Syris Management Software can be used with the SY210NT series controllers and is multi-language capable. Supporting Win95/98/Me/NT/2000/XP it is easily configurable and gives the capability of expanding the system from standalone to linking 99 controllers giving control up to 396 doors.

Management System software turns the SY210NT into a full access control system featuring real time event logging, database queries and reports, anti-passback, access level control, and even elevator control using the Syris DIDO Module.
