

# ES Car Park Controller Configuration

## LED 8 and LED 9

Indicating the communication status between PCI and Controller.

## LED 12 and LED 13 (Barrier 1 - Barrier 4)

Indicating the communication status between reader interface and controller.

## LED 14 and LED 15 (Barrier 5 - Barrier 8)

Indicating the communication status between reader interface and controller.

## LED 4 and LED 5 (Barrier 9 - Barrier 12)

Indicating the communication status between reader interface and controller.

## LED 6 and LED 7 (Barrier 13 - Barrier 16)

Indicating the communication status between reader interface and controller.

( For normal operating condition- all LEDs will blinking)

## Controller DIP Setting

To +12Vdc source  
To 0Vdc source (Gnd)  
To +12Vdc source

To PCI Uplink

Barrier 1 - Barrier 4 Downlink 1

Barrier 5 - Barrier 8 Downlink 2

Barrier 9 - Barrier 12 Downlink 3

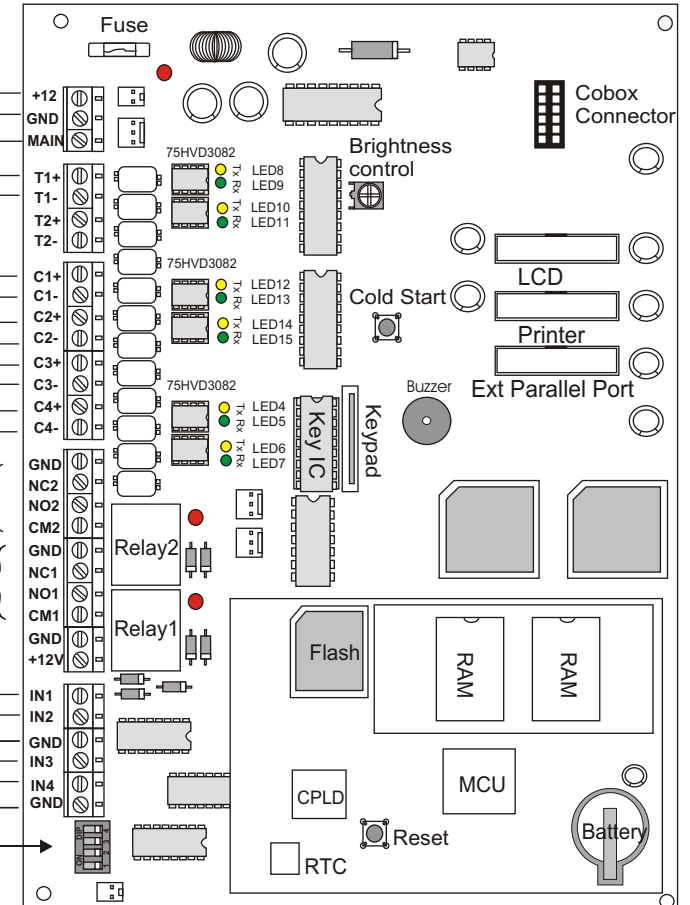

Barrier 13 - Barrier 16 Downlink 4

Output 2

Output 1

Input

Controller DIP

## Remarks:

- After installation, please perform 'Cold Start' procedure. Please refer to controller manual for proper Cold Start procedure.
- For single controller, DIP switch need to be set to address '00'.
- For multiple controller, please refer to figure 1 for address setting.
- Controller address should not be set the same to avoid data corruption.
- All input point must be ground with a 3.6K ohm resistor.
- All communication cable must be compliance to RS485 standard, with proper grounding & connected in multidrop connection.
