

# SUPER-LITE

## Automotive Lead Acid Battery Charger Series

### Automotive Lead Acid Battery Charger:

**SUPER-LITE** Lead Acid Battery Chargers are designed to cater for high volume battery charging up to 9 pieces of 12V battery or 18 pieces of 6V battery connected in series. This is made possible with the use of multiple voltage and current selections to provide various combinations of charging conditions to suit individual requirement.

They are supplied in heavy gauge steel casing complete with epoxy powder coated finishing and come in two different designs of fixed and multiple voltage / current selections.
